Product Highlights
The Omnistim 500 features a broad range of electrotherapy options for unmatched treatment versatility and efficiency in today's diverse clinical environment. The system is ideal for multidisciplinary rehabilitation use and the implementation of advanced electrotherapy protocols.

The Omnistim 500A includes these waveforms:
- Quad Polar IFC for pain control
- Pre-mod IFC for pain control
- Transcutaneous Electrical Stimulation (TENS) for pain control
- Medium Frequency Alternating Current (MFAC) Russian Neuromuscular Electrical Nerve Stimulation (NMES) for neuro-muscular re-education
- High Voltage Pulsed Current (HVPC) Monophasic for increased circulation
- Medium Frequency Nerve Block for effective pain management

Multi-Modality Features for Treatment Flexibility
- Easy-to-use clinical protocol treatment menu for all waveforms
- Wide range of built in protocols for pain management, muscle re-education, improving ROM, Spasticity reduction and more
- Includes Lead Wires, Electrodes, Patient Safety Switch, power supply and operator’s manual
- Portable light-weight design, optional carrying bag available
- Warranty - 1 years on the device

IFC with SUCTION: Connect your Omnistim 500A to the optional vacuum unit. Please call for details

COMBINATION THERAPY The Omnistim 500 may be combined with ultrasound therapy using stim-out port
